INTRODUCTION

FF series are isolated input/output, High Stability and low ripple HV modules. FF series are isolated by many kV from Ground. The filaments can be floated on voltages up to ± 2.5 kV (FFxx2.5), ± 10 kV (FFxx010), ± 20 kV (FFxx020), ± 30 kV (FFxx030). These units Output a 7.5Vdc and output current from 0 to 5A is controlled.

TYPICAL APPLICATIONS

Ion gun, Electron gun, X-ray filaments, travelling-wave tube filaments, float filaments, Klystron, Magnetron, Medical, chemical Applications, Laboratory Applications, Industrial Applications.
